Introduction to Digital CATI Recording

International Field Directors and
Technology Conference

Scottsdale, AZ

May 18, 2004

Eric White, Jeremy Kraft, Wes Taylor
University of Wisconsin Survey Center

It all started when...

- Spring of 2002 Wisconsin Longitudinal Study wanted to record cognitive test portions of ~29,000 interviews
- Recording essential to administration of the interview
- 29,000 recordings on cassette tapes?
- Talked to others who were doing digital CAPI recording, but not CATI recording

A vertical decorative graphic on the left side of the slide, featuring a black and white musical score with various notes and staves.

Google™ reveals SBWinLogger

- Captures and records audio input
- Command-line interface allows code to be called from and controlled by the CASES instrument
- IVs not required to start recording – instrument turns recording on and off automatically
- Can adjust recording bitrate to match low quality analog phone audio
- Records audio as standard .wav files

A vertical decorative graphic on the left side of the slide, featuring a black and white musical score with various notes and staves.

File Storage Requirements (or “Let’s Just Record the Whole Thing!”)

- 10 minutes of audio = 6.5 MB
- Typical WLS interview = 50 MB
- 200 WLS interviews per week
- 12 GB audio per week
- Client purchased 873GB RAID system
(price today is about \$3500)
- 255GB of audio to date

How well does it work?

- WLS success rate ~ 97%
- MIDUS success rate is 99.9%
 - Learned some lessons in WLS
 - MIDUS is much simpler instrument
 - Interviews done in one session
 - One lost recording (out of 500+) due to IV who ignored recording test failure

Essential Hardware

- 1) Phone
- 2) PC with soundcard
- 3) Recording software
- 4) Sufficient HD space
 - Both Local and Server
- 5) External Recording Box

External Recording Box

- Need hardware box to carry audio signal from phone to PC mic jack
- Radio Shack makes \$25 version
- JKAudio makes \$225 version which provides passive boost to incoming signal and allows user to adjust signal strength

Setup Schematic

Total Cost per Booth

\$200	THAT-2 with bulk discount
\$39	SBWinLogger per seat (based on site license)
1 hour	hardware and software installation, fine-tuning configuration and testing
1 hour	maintenance/year

Integrating Recording into CASES instrument

- Use CASES 'call' command
- Several bugs encountered
 - SBWinlogger cut off sound files
 - Strong naming standards
 - Developing code that only executed on the first pass

Applications to Survey Research

1. Scoring cognitive interviews (WLS, MIDUS)
2. Comparison of tobacco use in concurrent Wisconsin RDD Study
3. Competency screening for follow-up biological & medical studies
4. Public opinion poll, religious & ethnic diversity survey, law office study
5. Interviewer training and instrument review

Application to Cognitive Battery Administration

- Subjects' response time (latency) measured as a measure of cognitive ability

Application to Cognitive Battery Administration

- Category fluency recorded to capture more complex responses than interviewer can record in short time

A vertical decorative graphic on the left side of the slide, consisting of a black and white musical score with various notes and staves.

Application to Cognitive Battery Administration

- Records responses which could not be captured by interviewers due to complexity or rapidity
- Recording interview assures researchers that test was administered within acceptable limits
- Allows PIs to review each case separately and have detailed record of each R
- Recordings used as a screening tool to select Rs for further specialized studies

A vertical decorative graphic on the left side of the slide, consisting of a series of musical staves with notes and stems, rendered in a dark blue color.

Compare Interview Administration

Similar questions about tobacco use in concurrent RDD surveys of WI residents yielded different results

We began recording these questions to determine if any external effects could be influencing the results.

Item: tb2

Do you now smoke cigarettes every day, some days, or not at all?

- <1> EVERYDAY
- <2> SOME DAYS
- <3> NOT AT ALL

<r> REFUSED

SMOKING RATE BRFS: 23.3%

Caseid: 99999
Item: q13

Do you now smoke cigarettes every day, some days, or not at all?

- <1> EVERY DAY
- <2> SOME DAYS
- <3> NOT AT ALL

- <d> DON'T KNOW / NOT SURE
- <r> REFUSED

SMOKING RATE TOBACCO: 18.6%

BRFS RATE ~25% HIGHER THAN TOBACCO
